

MAMBU

4.5.8

Release Notes

Overview

About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Tips to help you maximize the benefits

Beyond the major new features, there may be additional enhancements or functional changes which will be included along with a brief description.

Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continually improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting support@mambu.com or your account manager.

Contents

1. Bug Fixes

1.1 KMBU-6 - Repayments are not extended with an interval when First due date offset constraints are in place

1.2 KMBU-14 - Invalid API response using filterElement LAST_DAYS

1.3 KMBU-17 - Notifications sent for user link Recipient are also displayed to other users linked and Credit Officer assigned to a client/group

1.4 KMBU-27 - Interest Rate is not correctly rounded for savings accounts with interest paid into Account

1. Bug Fixes

1.1 KMBU-6 - Repayments are not extended with an interval when First due date offset constraints are in place

When Offset constraints, like setting up a default for First Due Date Offset, only the first due date was shifted 7 days later, the other installments had the original due date and generated 2 installments with the same date.

In the current release, Mambu has corrected this behaviour.

1.2 KMBU-14 - Invalid API response using filterElement LAST_DAYS

An invalid response (INVALID_FILTER_VALUE) was returned when using filter element LAST_DAYS for LAST_MODIFIED_DATE / CREATION_DATE.

In the current release, Mambu has corrected this behaviour and all loan accounts having last modified date bigger than the specified number of days.

1.3 KMBU-17 - Notifications sent for user link Recipient are also displayed to other users linked and Credit Officer assigned to a client/group

When using two "user link" type custom fields for notifications and only one of them was set as recipient in the email or SMS template, then when creating a Client with opt-out for the notification with values for both "user link" fields, the notification was sent to both users under user-link fields and the Credit Officer, instead of sending it only to the user for the field used in the template.

In the current release, Mambu has corrected this behaviour. The notification will only be sent to the user specified for the field used in the template.

1.4 KMBU-27 - Interest Rate is not correctly rounded for savings accounts with interest paid into Account

Interest Rate was not rounded correctly for deposit accounts in certain scenarios, such as interest paid on account maturity, which resulted in small differences for the interest applied transactions in terms of what was expected to be applied vs. actual result.

Mambu applied an improvement by truncating to 20 decimal places vs the existing 10 decimal places, which will return a more accurate rounding.

Sandbox release date: Wednesday, 31st May, 2017
